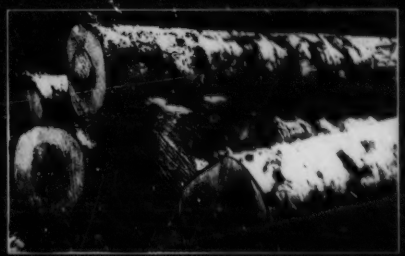
Directory of

Primary Wood-using Industries in Manitoba

2001



The Canadian Forest Service's Northern Forestry Centre is responsible for fulfilling the federal role in forestry research and technology transfer in Alberta, Saskatchewan, Manitoba, and the Northwest Territories. The main objectives are research in support of improved forest management for the economic, social, and environmental benefit of all Canadians.

The Northern Forestry Centre is one of five centers of the Canadian Forest Service, which has its headquarters in Ottawa, Ontario.

Le Service canadien des forêts, Centre de foresterie du Nord, représente le gouvernement fédéral en Alberta, en Saskatchewan, au Manitoba et dans les Territoires du Nord–Ouest en ce qui a trait aux recherches forestières, et au transfert de technologie. Cet organisme s'intéresse surtout à la recherche en vue d'améliorer l'aménagement forestier afin que tous les Canadiens puissent en profiter aux points de vue économique, social et environnemental.

Le Centre de foresterie du Nord constitue l'un des cinq établissements du Service canadien des forêts, dont l'administration centrale est à Ottawa (Ontario).

Bohning, R.A.; Middlebro', W.G.A.; Bell, J.L. 2001. Directory of primary wood-using industries in Manitoba, 2001. Nat. Resour. Can., Can. For. Serv., North. For. Cent., Edmonton, Alberta.

ABSTRACT

Primary wood-using industries in Manitoba were surveyed by telephone and personal interviews in 2000-2001. This directory gives a summary for each operation. Information is provided on mill production, products, wood supply, species utilized, employment generated, and markets. Sawmills, wood treating plants, log home builders, and the pulp, paper, newsprint, oriented strandboard, fiberboard, and particleboard mills are grouped by industry type and size of operation.

RÉSUMÉ

Les industries primaires du bois du Manitoba ont fait l'objet d'une enquête par téléphone et par entrevues personnelles en 2000-2001. Ce répertoire donne un résumé pour chaque entreprise. On y trouvera des renseignements sur la production des scieries, l'approvisionnement en bois, les essences utilisées, les emplois générés et les marchés. Les scieries, les usines de traitement du bois, les fabricants de maisons en rondins ainsi que les usines de pâte à papier, de papier, de journaux, de panneaux à copeaux orientés, de panneaux de fibres et de panneaux de particules sont groupés par type d'industrie et par leur taille.

CONTENTS

Introduction 1

Abbreviations and Terms Used in this Directory 3

Pulp, Paper and Newsprint, Oriented Strandboard, Fiberboard, and Particleboard Mills 7

Sawmill-Planing Complexes Producing More Than 5 MM fbm 15

Sawmill-Planing Complexes Producing 1 MM to 4.999 MM fbm 23

Sawmill-Planing Complexes Producing 100 M to 999 M fbm 41

Sawmill-Planing Complexes Producing Less Than 100 M fbm 73

Log Home Builders 95

Wood Treating Plants 111

Appendix I. Information Sources for Forest Industry 117

Appendix II. Metric Conversion Factors for Timber Products 127

Appendix III. Manitoba Government Forestry Personnel 133

Appendix IV. Manitoba's Timber Allocation System 137

Appendix V. Manitoba's Larger Timber Tenure Holders 141

DISCLAIMER

The views, conclusions, and recommendations are those of the authors. The exclusion of certain manufactured products does not necessarily imply disapproval, nor does the mention of other products necessarily imply endorsement by the Canadian Forest Service.

INTRODUCTION

This directory lists and describes the firms comprising the primary wood-using industries in Manitoba in 2000-2001. It updates improvements and changes in the industry since the previous directory was compiled in 1998. The directory includes all provincial forest industries and mills principally engaged in manufacturing lumber, pulp, paper and newsprint, particleboard, fiberboard, oriented strandboard, posts and poles, treated wood products, and log homes.

The information was collected in 2000-2001 through telephone and personal interviews with the managers or owners of the various operations. It relates to a 1-year operating period, either fiscal or calendar, ending in 2000-2001.

Each operation is briefly described in terms of its location, management, production, employment, wood supply, tree species used, and markets.

The directory is divided into seven major sections:

1. Pulp, paper and newsprint, oriented strandboard, fiberboard, and particleboard mills
2. Sawmill-planing complexes producing more than 5 MM fbm
3. Sawmill-planing complexes producing 1 MM to 4.999 MM fbm
4. Sawmill-planing complexes producing 100 M to 999 M fbm
5. Sawmill-planing complexes producing less than 100 M fbm
6. Log home builders
7. Wood treating plants

Product volumes, sizes, and descriptions are reported in units commonly used by each industry sector. Production is reported for lumber in foot board measure (fbm), roundwood in cubic metres (m^3), pulp, paper, and newsprint in (metric) tonnes, and oriented strandboard, fiberboard and particleboard in square feet (ft^2). A summary of the number of firms, total annual production, and employment estimates by industry category and size is presented in Table 1. Manitoba forest sections are illustrated in Figure 1.

Appendix I lists associations relevant to Manitoba's primary wood-using industries. Appendix II lists metric conversion factors used in this directory. Appendix III documents personnel of the Forestry Branch, Manitoba Conservation. Appendix IV provides information on Manitoba's timber allocation system. Appendix V lists Manitoba's timber tenure holders by forest section.

This directory provides information on the primary manufacturing capabilities of the Manitoba forest industry. The information will be of interest to people who are involved in manufacturing secondary wood products, buying or selling wood products, developing forest policy, and servicing forestry operations as well as government agencies and others who have an interest in Manitoba's forest industry.

The Canadian Forest Service has also published the *Directory of secondary wood-using industries in Manitoba, 2001*. Both directories are available free of charge.

ABBREVIATIONS AND TERMS USED IN THIS DIRECTORY

Units of Measure:

fbm	foot board measure
M	thousand
MM	million
in (O)	inch
ft (N)	foot
ft^2	square foot
ft^3	cubic foot
lb	pound
mm	millimetre
cm	centimetre
m	metre
km	kilometre
m^2	square metre
m^3	cubic metre
kg	kilogram
ha	hectare
t	tonne

Tree Species:

Coniferous Trees:

bF	balsam fir
DgFr	Douglas-fir
jP	jack pine
lP	lodgepole pine
rP	red pine
wP	eastern white pine
bS	black spruce
wS	white spruce
SPF	spruce/pine/fir
tL	tamarack/larch
eC	eastern red cedar
wC	western red cedar

Deciduous Trees:

tA	trembling aspen
wB	white birch
bPo	balsam poplar/black poplar
rO	red oak
ash	ash (green and white)

Acronyms:

ADMT	air-dried metric tonnes
CFPA	Central Forest Products Association
CTMP	chemi-thermomechanical pulp
FML	Forest Management Licence
MDF	medium density fiberboard
OSB	oriented strandboard
N/A	not available

Markets:

AB	Alberta
BC	British Columbia
MB	Manitoba
ON	Ontario
QC	Quebec
SK	Saskatchewan
US	United States

Definitions:

Custom sawing and/or planing:
The mills that provide this service cut and/or plane other industries' or individual's logs and lumber for a service charge.

Local: Market area within a 100 kilometre radius of a mill operation.

Person-year: Equivalent to 240 days at 8 hours per day.

Roundwood: Includes sawlogs, pulpwood, building logs, and fuelwood.

Table 1.

Summary of Manitoba's Primary Wood-using Industries in 2000-2001, Showing Number of Firms, Annual Production, and Employment

Industry	Number of firms	Production[a]	Employment in mills and woodlands (person-years)
Pulp, paper, and newsprint, oriented strandboard, fiberboard, and particleboard mills	6	18 M tonnes felt paper 36 MM ft^2 fiberboard (1/2 inch basis) 440 MM ft^2 oriented strandboard (3/8 inch basis) 35 MM ft^2 particleboard (3/4 inch basis) 175 M tonnes newsprint 155 M tonnes unbleached kraft paper	1495
Sawmill-planing complexes producing more than 5 MMfbm	5	185 MM fbm lumber 66 M m^3 roundwood 305 M m^3 wood chips 77 M m^3 hog fuel	1040
Sawmill-planing complexes producing 1 MMfbm to 4.999 MMfbm	14	23 MM fbm lumber 64 M m^3 roundwood 5 M m^3 wood chips	180
Sawmill-planing complexes producing 100 Mfbm to 999 Mfbm	29	8 MM fbm lumber 33 M m^3 roundwood 940 m^3 wood chips	90
Sawmill-planing complexes producing less than 100 Mfbm	140	3 MM fbm lumber 6.0 M m^3 roundwood	85
Log home builders	14	3 M m^3 roundwood	39
Wood treating plants	3	25 MM fbm treated lumber 11 M m^3 treated posts 9 M m^3 treated poles 20 M m^3 posts 4 M m^3 poles	142

APPENDIX II
Metric Conversion Factors for Timber Products

Manitoba Forestry Branch Factors For Metric Conversion

These conversion factors are used by the Manitoba Forestry Branch for official standard timber conversion and depletion factors.

Equivalency			Equivalency		
1 inch	=	2.54 centimetres	1 centimetre	=	0.394 inches
1 foot	=	0.3048 metres	1 metre	=	3.281 feet
1 yard	=	0.9144 metres	1 metre	=	1.0936 yards
1 chain (66 ft)	=	20.1168 metres	1 metre	=	0.0497 chains (66 feet)
1 mile	=	1.609 kilometres	1 kilometre	=	0.621 miles
1 square foot	=	0.092903 square metres	1 square metre	=	10.764 square feet
1 acre	=	0.4047 hectares	1 hectare	=	2.471 acres
1 square mile	=	2.590 square kilometres	1 square kilometre	=	0.386 square miles
1 cubic foot	=	0.0283 cubic metres	1 cubic metre	=	35.3147 cubic feet
1 gallon	=	4.546 litres	1 litre	=	0.220 gallons
1 cubic foot/acre	=	0.070 cubic metre/hectare	1 cubic metre/hectare	=	14.913 cubic feet/acre
1 pound	=	0.4536 kilograms	1 kilogram	=	2.2046 pounds
1 ton	=	0.907 tonnes	1 tonne	=	1.102 tons

Selected Conversion Factors for Forest Products

Product	Imperial Measure Content	Metric Content
Pulpwood and fuelwood	1 cord (100 inch bolts)	2.5 m^3 (approximate) 3.77 m^3 (stacked)
Lumber	1000 fbm	5.66 m^3 8.55 m^3 (stacked)
Hydro poles	19 ft^3 per pole	0.54 m^3 per pole
Railway ties	5 ft^3 per tie	0.14 m^3 per tie
Fence posts to 9 feet	1.0 ft^3 per post	0.03 m^3 per post
Fence posts to 19 feet	1.5 ft^3 per post	0.04 m^3 per post
Fence rails (not exceeding 5 inches in diameter at butt end × 16 feet long)	10 ft^3 per 100 lineal feet	0.04 m^3 per rail
Round timber		
7 inch butt end	15 ft^3 per 100 lineal ft	0.42 m^3 per 30.5 lineal m
9 inch butt end	30 ft^3 per 100 lineal ft	0.85 m^3 per 30.5 lineal m
12 inch butt end	60 ft^3 per 100 lineal ft	1.70 m^3 per 30.5 lineal m
12+ inch butt end	100 ft^3 per 100 lineal ft	2.83 m^3 per 30.5 lineal m

Source: Manitoba Conservation, Forestry Branch.

Other Forestry Conversions

The conversion factors shown below are approximate values and may vary in other areas. These conversions are generally used in Manitoba.

1 bone dry unit (BDU) 2400 lb (wood chips)	=	1090 kg
1 oven dry unit (ODT) 2204 lb (wood chips)	=	0.918 BDU
1 oven dry tonne wood chip weight to volume conversion	=	2.5963 m^3
1 unit (hog fuel)	=	200 ft^3 or 72 ft^3 of solid wood
1000 ft^2 of sheet product (3/8" basis)[a]	=	0.844 m^3
1 cunit (100 ft^3)	=	2.83 m^3 roundwood
2 cunits of roundwood	=	1000 fbm
1 ft^3 of roundwood	=	5 fbm

[a] Industry standards show structural panels (plywood, OSB) in thousands of square feet based on 3/8" thick panels and particleboard in thousands of square feet based on 3/4" panels (One 4' × 8' sheet of panel 3/8" thick contains 1 ft^3 of material). Production equivalents in metric units are usually given in cubic meters (m^3) regardless of the sheet thickness.

APPENDIX IV
Manitoba's Timber Allocation System

Manitoba's Timber Allocation System

The province of Manitoba has three basic methods for allocating timber to the private sector.

1. Forest Management Licenses (FMLs) are negotiated agreements in force with only the very largest forest industry companies. There are currently three in Manitoba.

2. Timber Sales Agreements are the principal means of allocating timber to the forest industry for periods longer than 1 year. There are four types:

    a. Timber Sale Quotas [a]

    b. Timber Sale Auction sales

    c. Timber Sale Special allocations

    d. Timber Sale Community sales

3. Timber Permits are the principal means of allocating timber to relatively small operators or the public and are in effect for up to 1 year only. There are four types:

    a. Timber Permits Quota - commercial

    b. Timber Permits Non-quota - commercial

    c. Timber Permits Own use

    d. Timber Permits Salvage

Other ways of obtaining timber:
Purchased private
Purchased crown
Private

[a] In 1965, Manitoba introduced a Timber Quota System Policy whereby established small and medium timber operators would have access to a timber supply via a Timber Sale Agreement (TSA) or a Timber Permit (TP) until 1980. This quota policy was reviewed and renewed in 1980 and 1990. There are conditions the agreement or permit quota holder must abide by, which include the ability to transfer timber to another party. Through amalgamation and puchase, the original 2,526 quotas granted in 1965 have been reduced to 211 in 2000.

APPENDIX V
Manitoba's Larger Timber Tenure Holders

Large Timber Quota Holders in Manitoba
(approximately 1000 m^3 or larger)

The larger crown tenure holders are an integral part of the wood-using industry in Manitoba, but not all holders necessarily have a log conversion operation. All larger tenure holders are listed here so that the majority of the primary wood-using industry is included in this directory. Note that some tenure holders may operate in more than one forest section.

ACKNOWLEDGMENTS

Sincere appreciation goes to all persons who contributed information to make this directory possible, especially the owners and managers of the primary forest products industry in Manitoba. Their contribution is gratefully acknowledged.

The authors thank Diana McGhee for her help in interviewing the forest operators and Karen Gervais for data entry and editing assistance. Appreciation is also extended to Kelly Petkau (Canadian Forest Service) for his computer programming assistance.

Funding assistance was provided by the Manitoba government; this contribution is gratefully acknowledged.
